DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group III (Paper No. 24) and the specific elected composition namely a composition comprising the following elected components only: galactose oxidase and i) a galactose oligomer, ii) a galactose oligomer and a galactanase or iii) a galactanase (paper number 29) is acknowledged. The traversal is on the ground(s) that the application is filed under 35 USC 371 and not 35 USC 121. This is not found persuasive because as is noted in this action the composition is known as is evidenced by the applied references and thus the inventions do not share a special technical feature.

The composition of group III will only be examined as containing these components noted above. The other components of the claims are not included in this election and thus will not be examined.

Claims ~~25~~ 27, 30, 31, 36-39, 44-52 are withdrawn from further consideration.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1654

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28, 29, 32-37, 40-43, 53 rejected under 35 U.S.C. 102(b) as being anticipated by Coughlin et al. (col. 12) , Montgomery (see whole reference, especially the claims), or Rosen et al. (see col. 2).

The references teach lactose (a galactose oligomer) and galactose oxidase.
